

The imperative for UG Research Based Learning in the Age of Generative AI

The 3rd Colloquium Series by the Australasian Council of Undergraduate Research

In partnership with the University of Western Australia,

Community of Practice on Embedding Research into Curriculum

This online panel discussion will explore the importance and relevance of integrating research into teaching as a whole of curriculum pedagogical approach universities can utilise to respond to the impact of generative artificial intelligence in higher education.

Our three speakers will outline how research-based learning (RBL) can support and help assure university students are actively engaged in their own learning; from a theoretical, curriculum design and student experience perspective.

- **Emeritus Professor Angela Brew** is recognised as one of the foremost researchers and scholars on the inter-relationship between research and teaching gained through her lead role as an Australian Learning and Teaching National Senior Teaching Fellow, and senior positions at the University of Sydney and later Macquarie University where she led undergraduate research initiatives. Professor Brew established and has been Chair of ACUR since its establishment in 2013.
- **Professor Pauline Ross** is Director of Academic Leadership and Innovation and previous Associate Dean (Education) and Deputy Head of School at the University of Sydney and Professor of Marine Ecology and Higher Education. As a National Teaching Fellow of the Office for Learning and Teaching she has explored the evolution and resilience of academic roles and is currently undertaking curriculum transformations to ensure the academic integrity of student learning.
- **Sara Wardak**, is the current Head of the ACUR Student Committee, established by students to support the value of undergraduate research experiences. Sara will provide a personal account of the value of engagement in research to her learning and an overview of the beneficial legacy of the 12 years of the National Undergraduate Research Conference hosted by ACUR.

When: Tuesday, 22nd October 2024

Time: 2pm – 3pm (Perth Time) - 5pm – 6pm (AEDT Time)

Where: Online, through MS Teams, link sent post registration.

Register: [Eventbrite link for registration](#)

ACUR's 2024 Student Conference on 2-3rd December focuses on the related theme of “**Undergraduate Research in the Age of Adaptive Change and Artificial Intelligence**”. For more information go to <https://www.acur.org.au/2024-conference/>
